

Beaded Necklace

Teen-To-Go

Gather your supplies. You should have an assorted supply of beads and colored jewelry cording. You will also need scissors and a paper clip.

1

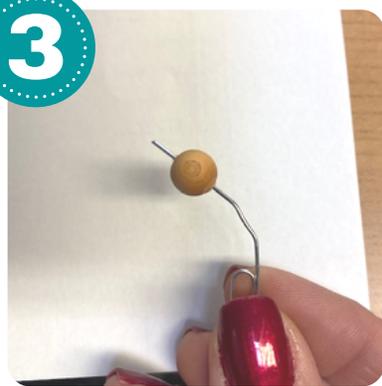

2

String as many beads onto the colored jewelry cording as you wish. The pattern is also entirely up to you.

3

Sometimes the hole in the bead has debris in it. Clear the hole in the bead by passing a bent paperclip or toothpick through it.

4

Once your pattern is complete, even up the two sides of the cording.

5

Knot method 1:
Loosely tie your two ends together into one knot. Make sure you have left enough room to lift your necklace on and off over your head.

6

Knot method 2:
If you want to make your necklace adjustable, there is a special way to tie two knots. I have included a link to a great YouTube video on how to tie necklace knots. Or scan the QR code below to take you directly to the video.
