

# Teen Dancing Person

## Paperweight **Teen-To-Go**

Gather your supplies. You should have two pipe cleaners, up to six plastic straws, a mound of air dry clay. You will also need sharp scissors and a bowl (optional).

1

2

Use a pair of scissors to cut the straw into little pieces. In order to keep the straw pieces from landing on the floor, cut slowly and into a bowl.

3

String the cut pieces of straw onto the two pipe cleaners. Leave each end of the pipe cleaners exposed. One pipe cleaner will be the arms. Roll up the ends to look like fists.

4

Cross the "arms" pipe cleaner over itself to form a head. You can give it a twist to secure it.

5

Place the other pipe cleaner (legs) through the head opening allowing each pipe cleaner "leg" to dangle down.

6

Pull the two "legs" together and twist to secure it to the head. About an inch away from the head, twist the "legs" together again to make the body. Flare out the "feet" to secure the straw pieces.

7

Mold your clay into a stable, solid mound. make sure it has a flat base.

8

Press one of the "feet" into the top of the clay. Press the clay securely around the inserted pipe cleaner, Allow the clay to air dry over night.
