

# Jewelry Box

**From princess to pirate, everyone has a  
treasure to protect!**

Guard yours in a popsicle stick jewelry box.

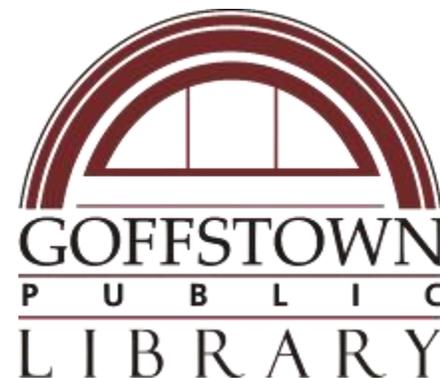

## Supplies:

- Two hundred seventy-five (275) craft sticks
- Three (3) wooden knobs
- Two (2) sheets of paper
- Writing utensil
- Ruler
- Scissors
- Tape
- Hot glue gun
- Small blade knife (optional)

## Instructions:

1. Measure and mark three (3) four and a half inch (4.5") squares on the paper. Cut out using scissors.
2. Draw an 'X' through the squares, corner to corner as in **Fig. 1**.
3. Turn the squares so the 'X' is a '+'. Place two squares next to each other so the far right corner of one touches the far left corner of the other, as in **Fig. 2**.
4. Lay the third square over the previous two, so the left and right corners of the top square touch the centers of the bottom two. See **Fig. 3** for reference.
5. Tape in place.
6. Hot glue craft sticks to the paper base starting with the angles that, reading from left to right, slope up, as in **Fig. 4**.
7. Now add craft sticks to the angles that, reading left to right, slope down, by applying hot glue to the craft sticks of step six (6). Your result should look like **Fig. 5**.
8. Repeat steps six and seven (6-7) until you can count thirty (30) craft stick layers at one corner as in **Fig. 6**.
9. Rip off the paper base and remove any hot glue that remains. A knife with a small blade may be helpful.
10. Hot glue as many whole craft sticks to the bottom of the box as possible, creating a base (**Fig. 7**).

12. When the base is complete (**Fig. 9**) Add several craft sticks sloping in the opposite direction, as in **Fig. 10**. This will provide structure to the box.
13. Begin crafting the lid. On the top of the box, add a layer of crafts sticks to the angles that, reading left to right, slope up. Do not glue.
14. Now add craft sticks to the angles that, reading left to right, slope down, by applying glue to the craft sticks of step thirteen (13). Set the box aside. Your result will look like **Fig. 11**.
15. Add your next layers of craft sticks slightly adjacent to the previous layer, as in **Fig. 12**. You will be shrinking the frame closer, and closer together (**Fig. 13**), until you ultimately end with only one (1) craft stick at the apex of three (3) pyramids (**Fig. 14**).
16. Hot glue decorative knobs or beads to the apex of the pyramids (**Fig. 15**).
17. Cut the curves off four (4) craft sticks as in **Fig. 16**.
18. Turn over the lid. Glue two (2) the sticks from step seventeen (17) into the far left corner as illustrated in **Fig. 17**. Repeat for the far right corner.
