

# Teen Zombie Beanies

Teen-To-Go

1

**Step 1:** Gather your supplies. You should have 1 cotton beanie, 1 swatch of brain printed fabric, 1 sewing needle, black yarn (about 36in), a pair of eyes with clip on washers. You may also need scotch tape, a ruler, and scissors.

**Step 2:** Begin by cutting the brain printed fabric into a rounded brain-like shape.

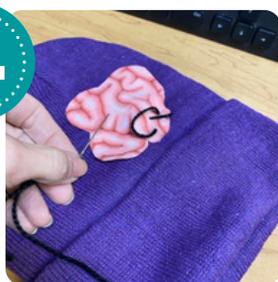

**Step 3:** Cut the black yarn into two pieces - about 12 in. long, and about 24 in. long. Using the 12 in. piece, thread it through the needle (place scotch tape on the end to help) and double knot the tail end. Sew a scar by coming up through the inside of the beanie and back down. Repeat, for however long you want the scar. Next, make stitches across the scar by repeating the same technique. When finished, double knot the thread inside the beanie to secure. Cut off the left-over thread.

3

**Step 4:** Rethread the needle with the 24 in length yarn and knot the end. Place the brain fabric on the beanie and secure by sewing "X"s on the beanie using the same up from inside the beanie, and down sewing technique. Make as many "X"s as you want, and when finished double knot the thread inside the beanie to secure. Cut off the left-over thread.

4

**Step 5:** It's time to attach the eyes. Decide how you want to place the eyes - wide apart, close together, lopsided etc.) Make two small slits in the cuff of the beanie. Push the eye screws through and secure on the back side with the white washers.
