

# Teen No Sew Fleece Hat

Teen-To-Go

Gather your supplies. You should have a 27 in x 16 in piece of fleece and masking tape. You will also need sharp scissors and a tape measure or ruler.

Cut out the upper right square that was made by the intersecting tape.

Cut 1/2-inch strips up to the masking tape on both sides with the tape. Use the tape as a guide to know where to stop the cut.

Gather the untied strips on the top of the hat, leaving out one set of strips closest to the knots. Use this pair of strips to tie around the gathered fringe with a double knot.

Fold the fleece fabric in half. With the fold on the left, place a piece of masking tape 3 inches down from the top and 3 inches in from the side without the fold (the right side).

Remove the tape that was just next to the cuts. Leave the remaining tape as this will be your fringe cut guides.

Tie the strips into knots along the longer side. (This will become the back of the hat.) Then, remove the tape from both sides. Do not tie the cut strips on the short side.

Fold up the bottom of the hat once or twice to form a cuff. That's it!
