

# Mummy LED Candle

Teen-To-Go

Gather your supplies. You should have a clear jar, container of Mod Podge, LED tealight candle, 2 black paper circles, 2 googly eyes, strips of cheesecloth, & a paint brush. You may also need scissors.

Paint the outside of the jar with Mod Podge. Your paint brush may be foam or bristled.

Stick the googly eyes to the black circles with Mod Podge (if not sticker backed). Attach the whole "eye" to the jar with more Mod Podge.

Begin by separating your cheesecloth into single layer strips.

Next, wrap the strips of cheesecloth around the jar. Wrap in layers, adding Mod Podge if needed, to have a good mummy effect.

When dry, turn on the tealight candle and place it inside the jar. Voila! Place your mummy in a favorite location.
