

Mini Pull Pinatas

Teen-To-Go

Gather your supplies:
3 toilet paper tubes, 6 tissue paper colors (cut into 2x7 rectangles), ribbon (for top and bottom of each tube), tissue paper squares, candy, scissors, tape, glue*

Take one square that you just cut. Tape it to the bottom of a toilet paper tube. We will work on one tube at time. Repeat these steps for each tube.

Cut into each fold up to the tape. You are fraying the edges of the tissue paper rectangles. Do this for each color.

1

2

Cut the large tissue paper pieces into squares. These are the tops and bottoms of the pinata.

3

4

Now take **one** 2x7 rectangle of each color. Fold in half (the fold should be at the bottom). Run tape along the top of each strip.

5

6

Starting at the bottom, wrap one of the colors (pull the rectangle up with the tape still attached). Continue to barely overlap each color going up the tube.

7

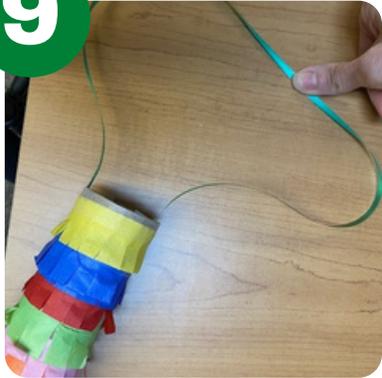

When you get to the top, and your last color, just tuck the tape into the top of the toilet paper tube.

8

Grab the larger piece of ribbon and tape one end to the inside of the tube. Tape it good! You could use glue as well. Repeat with the other end of ribbon.

9

You now have a loop for hanging the pinata!

10

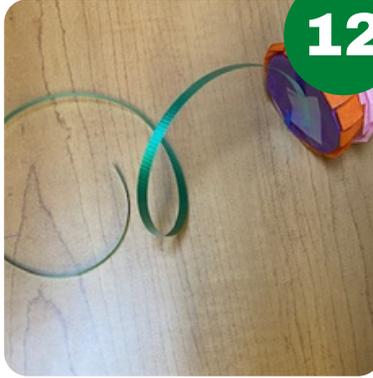

Put in about three pieces of candy, as well as some confetti (cut little pieces from your other larger tissue squares).

11

Using a glue stick, apply glue around the top of the toilet paper tube. Press a square of tissue paper onto the top and let it dry. Cut away the excess.

12

Finally, loosely tape the shorter piece of ribbon to the bottom. This is the pull for your candy to drop!
